

Lyrasis Hosting Services empowers libraries, archives and museums with expert, community-aligned hosting solutions. Guided by nonprofit values, Lyrasis provides a compelling alternative to self-hosting or commercial vendor dependence through its reinvestment in the software and ethical pricing.

Lyrasis is the Organizational Home for ArchivesSpace and is proud to be a Registered Service Provider for ArchivesSpace hosting. Lyrasis hosting staff support the global ArchivesSpace community by contributing software development, code patches, technical support, and serving in community working groups.

For more information or to request a quote for hosting, please visit lyrasis.org/archivesspace-hosting or email DigitalServices@Lyrasis.org.

Lyrasis ArchivesSpace Hosting Services includes

- Tiered hosting plans for repositories of all sizes; Lyrasis and ArchivesSpace member discounts available
- Access to the ArchivesSpace user documentation and recorded video training library
- Installation, configuration and software upgrades
- Disaster backup and recovery including database point-in-time recovery and nightly backups with all data encrypted at rest
- Maintenance for underlying operating system components and security patches
- Branded public interface and URL (for standard hosting tiers)
- API and OAI-PMH access and configuration

Optional additional services include expert and efficient data migration services, single-sign on integration, test environment(s), and read-only access to your database for SQL queries.

Testimonials

When **Columbia University Libraries** adopted ArchivesSpace in 2019, we chose Lyrasis as our hosting vendor. While we could have chosen to self-host, having Lyrasis' expert staff administer the system has allowed our archival staff to focus on archival work, and freed our digital staff to do other important systems work that can only be done here.

Denver Public Library has hosted with Lyrasis since 2016. We could not have handled the migration of our legacy data without them. [...] Along the way, the Lyrasis team helped us solve technical glitches and advised us whenever we needed help.
